

PUBLIC HOUSING PROJECTS IN THE BRONX

Melrose Houses

On these pages are shown photographs and architects' conceptions of the Public Housing projects now completed, contemplated or being built in Bronx County. In addition, other projects are to be scheduled in the near future.

While the Bronx Board of Trade is opposed to Public Housing other than certain slum clearance programs of which it has already

approved, the illustrations on these pages are produced to draw attention to the vastness of the total projects now under way.

For Board of Trade members, there is available, on request, complete information on all the public housing projects in the Bronx. This information includes up-to-date data on boundaries, income limits, contracting firms, architects and other pertinent material.
